

ZAP FOR MICROSOFT DYNAMICS NAV

“Our company has saved over \$150,000 in the last 2 years in consulting fees alone.”

Caroline Veillette, Metaux Tremblay Inc.

DATA INTELLIGENCE FOR MICROSOFT DYNAMICS NAV

- Governed data modeling, automation & visualization web application
- Complete data models and analytics
- Automatic Discovery of customizations
- Use ZAP for reporting & visualizations, or other Self-Service BI tools such as Power BI
- Tailored for Dynamics NAV

ZAP has the only business intelligence application in the market that provides an enterprise-grade data platform that is deeply integrated with Microsoft Dynamics NAV for the rapid deployments and customizations of pre-built trusted data models and analytics.

ZAP for Microsoft Dynamics NAV helps organizations meet—and exceed—their business requirements with intelligently built capabilities for every industry including Manufacturing and Wholesale/ Distribution.

From financial management to sales and operations management, our Microsoft Dynamics NAV solution will give your organization the insights it needs to support crucial decisions accurately and instantly.

BENEFITS

- Gain greater insight into your data and deliver effectively to your business
- Easy to use, deploy and customize
- Meet data and analysis requirements for your entire organization
- Integrate and enrich your data with other datasources
- Ensure strong data governance through trusted data stores
- Self-Service and ad-hoc analysis using ZAP or other Self-Service BI tools

GOVERNED DATA MODELING PLATFORM

Unlike many alternatives, ZAP is a unique enterprise data modeling and visualization web-application, offering:

- strong **data governance** (quality, administration, data security, usage auditing)
- an automated **3-tier data architecture** (staging, data hub, OLAP store)
- **many connectors** to apps, files or cloud datasources
- simple and **intuitive** UI for a wide range of user types
- enterprise-grade **data modeling**
- mature **visualization**, dashboarding and **ad-hoc reporting**
- alerting, **report distribution** and **printing** (PDF, Excel)
- a responsive **web application**, optimized for mouse and touch on any device

TAILORED FOR MICROSOFT DYNAMICS NAV

ZAP's support for Microsoft Dynamics NAV goes beyond simply connecting and extracting data from **NAV 2009, 2013, 2015 and 2016**.

Our deep integration with Microsoft Dynamics NAV improves the data modeling, deployment and overall users' experience. Thanks to ZAP's **smart data sources** for Dynamics NAV, ZAP can deploy **governed BI** solutions that are **deeply integrated with Dynamics NAV** in days not weeks or months like other traditional tools. Below is an overview of the metadata ZAP extracts and other deep integrations with Dynamics:

- **NAV Metadata** (relationships, data types, captions for option fields)
- **Multi-Company merging**
- **NAV Financial dimensions**

- **Customization detection**
- **Multi-currency**
- **Chart of Accounts** & account category grouping
- **Merge multiple NAV instances**
- Multiple Date Calendars, including NAV calendars

COMPLETE DATA MODELS AND ANALYTICS

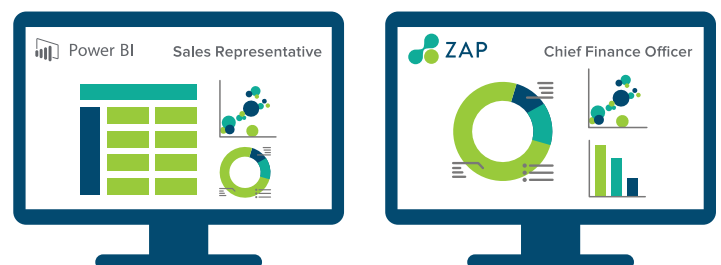

Why build or start from scratch when you can leverage ZAP's complete data solutions and give your organization better insights more quickly?

Get access to pre-built data models that can be easily customized and leverage over 300 packaged calculations, analytics and role-based dashboards that you can use instantly, for every major domain:

- **Finance** (GL, AR, AP)
- **Supply Chain** (Sales, Procurement, Inventory)
- **Manufacturing** (Production, discrete or process)

ZAP DATA INTELLIGENCE WITH OTHER SELF-SERVICE BI TOOLS

ZAP understands you may already have invested in a different BI Visualization tool and may only be interested in ZAP's unique Data Intelligence Automation platform. ZAP Data Intelligence generates Trusted/Governed data stores that may be secured and combined with other data. It is a perfect fit with any **Self-Service BI** tool such as Power BI.

TRUST YOUR DATA
